

NIMBUS FORENSICS FOR CASE & QUALITY MANAGEMENT

Forensic science evidence is a critical component in over 90% of all investigations. The sheer volume, diversity, and complexity of materials ranging from mobile devices, CCTV footage, cloud storage, DNA, fingerprints and more, presents significant challenges for timely and effective analysis. Currently, much of the process for securing, transferring, and analysing digital evidence remains manual and through multiple systems, which slows down investigations and places a heavy burden on forensic analysts. The lack of automation contributes to growing backlogs and delays in justice.

The forensic sector has long been underserved by digital innovation, particularly in the area of case and quality management systems. A fit-for-purpose solution is needed, one that enhances evidence management, streamlines workflows, fosters cross-disciplinary collaboration, and offers real-time visual oversight of cases to help tackle growing backlogs and relieve administrative burdens.

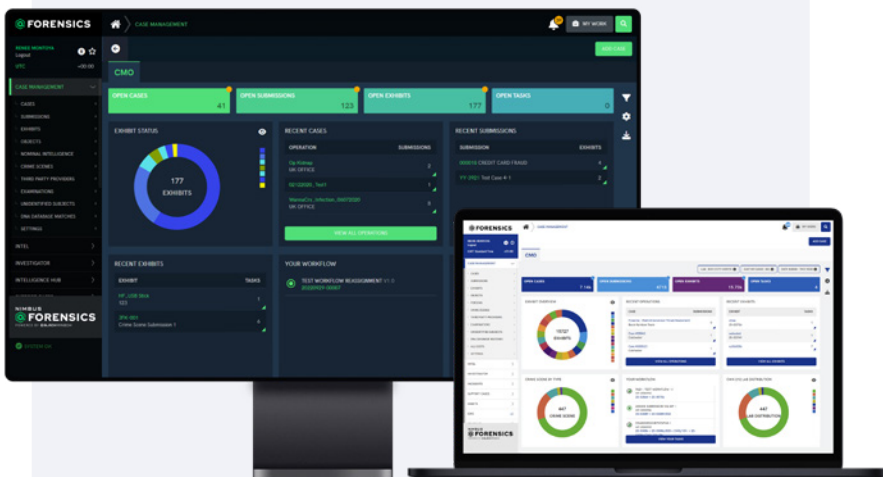

BlackRainbow offers a solution with **NIMBUS Forensics** that streamlines investigations, enabling your team with a single powerful tool designed for efficiency and accuracy.

What is NIMBUS Forensics?

NIMBUS Forensics stands as a comprehensive Forensic Case and Quality Management System deployed on premise or cloud hosted, facilitating access to critical information across every facet of the Forensic Laboratory lifecycle. Laboratory Managers, Laboratory Technicians, Crime Scene Investigators, Digital and Traditional Forensics Investigators; all are offered a rich array of features and functions designed to meet their diverse needs, including a remote submission portal capability.

Key Features

- » End to End Case Management
- » Crime Scene Management
- » Exhibit & Asset Management
- » Forensic Workflows Management
- » Submission Portal
- » Forensic Management Unit
- » MI Reporting & Evidential Reporting
- » Data Retention Management
- » Integrated Quality Management System
- » Access Control & Audit Management & more!

Benefits

- » SOP-Aligned Automation & Workflows, Increasing Quality
- » Real Time Case Visibility & Reporting
- » Faster Case Progression & Victim Support
- » Comprehensive & Auditable Chain of Custody Record
- » Regulatory Compliant Data Retention & Disclosure
- » Unified System for all Forensics Disciplines
- » Integrated QMS, Supporting Standards incl. ISO/IEC 17020 & 17025
- » User Enablement, Training & Support

Who uses it?

- » Laboratory Managers
- » Forensic Submission Managers
- » Digital Forensics Teams
- » Traditional Forensic Teams
- » Exhibit Managers/Officers
- » Forensic Analysts/Examiners
- » Forensic Service Providers

Why NIMBUS Forensics?

“Dependable Case Management; Uncompromising Quality”

NIMBUS Forensics was designed to address a market void of forensic case and laboratory management driven by the upcoming demands of ISO/IEC 17020 and 17025 and related standards. **NIMBUS Forensics** serves all forensic science disciplines. The cross-discipline design and approach enables centralised workflows to be built and leveraged to deliver significant production efficiencies, greater collaboration and improved case transparency. By removing the siloed discipline approach **NIMBUS Forensics** delivers a radical reduction in the operating risk and unnecessary duplication of running multiple separate cases, workflows and LIMS systems.

Why BlackRainbow?

BlackRainbow are experts in technologies, workflows, protocols and processes across the fields of investigation and intelligence. We have worked as, and with, Investigators in over forty countries over the past two decades to understand their challenges and develop solutions to meet their needs.

Our **NIMBUS Ecosystem** is the Global industry standard and leader for investigative case management across multiple disciplines. Designed and built by Investigators for Investigators.

BlackRainbow is globally trusted by mission Critical Agencies, Law Enforcement, Large Finance & Corporate Bodies, Government Entities, Counter Terror and Security Teams.

“NIMBUS GIVES US A MUCH IMPROVED OVERVIEW OF ONGOING INVESTIGATIONS, MANAGES THOUSANDS OF DATA OBJECTS, STANDARDISES STEPS, AUTOMATES TASKS, AND REDUCES WORKLOAD - MAKING COMPLEX INVESTIGATIONS EFFICIENT AND REPRODUCIBLE.”
